EDUCATION

Georgia Institute of Technology
Bachelor of Science in Computer Science

Atlanta, Georgia
Dec 2023

EXPERIENCE

Founder / CEO

SupplyDrop, Inc.

January 2023 – Present

Atlanta, Georgia

- Sole developer of a SaaS startup that automates the listing process for businesses with stale inventory.
- Manage \$50M+ of customer inventory and have enabled the net sale of \$1.2M across multiple sales channels.
- Uses a fine-tuned LLM that improves STR by over 40%, saving customers 100s of hours of manual optimization.
- Developing a full-stack web application using React, Node.js, MongoDB, Typescript, and Tailwind CSS.

Software Development Engineer Intern

Amazon

May 2023 – August 2023

Manhattan, New York

- Designed and implemented a new production-facing layer within Amazon's Advertising API Proxy Service, streamlining the deprecation of legacy endpoints and substantially reducing unnecessary development time.
- Created a new internal package / pipeline from scratch using Java, with multiple stages, unit & integration test cases, and multi-region compatibility, ensuring it meets the same resiliency standards as the rest of the service.
- Designed to withstand 14,000 TPS funneled via every request made to Amazon's global Advertising API.

Software Development Engineer Intern

Amazon

May 2022 – August 2022

Sunnyvale, California

- Implemented lazy loading during the fetch of Alexa Shopping List Savings categories and category based deals.
- Modified the DynamoDB and backend layers to implement a paginated request/response structure.
- Used React Native to modify the client application to dynamically make paginated requests.

Software Engineer Intern

NCR

May 2021 – August 2021

Atlanta, Georgia

- Spearheaded a project that merges two of NCR's digital banking acquisitions, Digital Insight (DI) and D3 Banking
- Modified D3 Banking's UI to allow requests from DI's backend server to be made by creating a middleman facade layer using Spring Boot.
- Migrated key components like Accounts, Bill Pay, Transfers, and UI configurations.

PROJECTS

[Acquired] Truth or Drink | github.com/aravindnatch/truth-or-drink

- An online ad-free version of the card game, truth or drink.
- At peak, ranked #1 on Google for "truth or drink"
- At peak, received 10K/mo search impressions with 20% CTR
- Built with Next.js and deployed for \$0/mo

Picture Perfect | github.com/aravindnatch/pictureperfect

- A React Native app that uses augmented reality and Machine Learning to tell you how to take the most optimal picture based on your surroundings and user inputted preferences.
- Parses GPS data, current lighting, sun position, object relativity, and other factors to determine not only the most optimal location for the user to stand but also the most optimal location for the photo taker to stand as well.
- After scanning the area, two AR bodies are rendered on the app showing where both parties should stand.
